Citizen Writes His Opinion of Civic Duties

While we welcome letters on public questions submitted for publication in our columns, we do not hold ourselves responsible for the ideas expressed therein. Ed.

Editor, Redcliff Review.

As the Municipal election will be held early next month, the electors should give special attention to their duties and privileges bestowed on them by the various acts of the Legislature. The first proceeding is to invite prospective candidates to allow their names to be placed on the nomination forms and send that the forms are properly filled in. On nomination day at the time as advertised the nominations will be received by the returning officer for a period of one hour; at the expiration of that time the returning officer will declare what nominations have been accepted and if there are more nominations than positions to be filled, he will state time and place of election, provided that there are no withdrawals by candidates within a time specified (usually the Wednesday next).

It is to be hoped that electors will use influence to get a good selection of candidates, this being a most important duty as a first part of their means of giving representative, democratic government closest to the people.

If the elector takes little interest in the election how can they fill up the list with names who expect their representatives to give good service.

The welfare of the residents of the town is a direct responsibility of those in office to fulfill their obligations to the best of their ability; though at times they may be unjustly criticized by the man on the street corner.

However, there is one thing that I wish to have drawn to your notice; that is in respect to the Local Board of Health, the members of which are appointed by and responsible to the Town Council. As a resident of the during the past year I have not seen much evidence of work of the Board of Health either on present conditions or any preventive methods; and as it is the Clinic for young children which seems to be functioning satisfactorily.

Do the Board members meet regularly and often or are they a passive organization waiting for some epidemic to get started before they take action?

Leaving these observations for your consideration

Yours truly
TOWN RESIDENT

GORDON MEMORIAL

Sunday, January 22nd, 1939.
10.00 Sunday School.
7.30 Evening Service.—This will be an illustrated service with beautiful slides.
Everybody Welcome.

Remember—it takes about a month to fill an order for Counter Check Books. Don't wait until you are out of books, but check up your stock right now. The Review can give you the lowest standard price and the best possible service.

Federal Government & The Refugee Problem

Pro Arguments as Submitted to Commons by C.N.C. on Refugees

The Canadian National Committee on Refugees and Victims of Political Persecutions held its first meeting in Ottawa, Dec. 6 to 7, 1938 and passed certain resolutions which were later transmitted to the Canadian Government. In the third of these it expressed the belief that "the immigration of carefully selected individuals or groups of refugees."

Canada will prove of genuine value in our national economy by introducing skilled workers, and new arts, crafts and industries.

Some economic arguments in brief, favoring the admission of refugees into Canada, were included as follows:—

(1) The refugees may establish some new industries, in which they are skilled, such as potteries, glass ware, beadwork, chemicals, dyes, some forms of cutlery, novelty gloves, toys, leather work, and even time jewelry. Sir Samuel Hoare recently stated that since 1933 the United Kingdom had received 11 thousand German Jews (who were allowed to remain only on condition that they proved to them selves competent to perform tasks for which no English were specially fitted) and these 11,000 men were already employing 15 thousand Englishmen.

(2) A large of these potential manufacturers have already made a mark on a world market, and could, if given a chance, open up that world market for Canada.

(3) If we do not receive refugees, much Canadian money will be subscribed and sent out of the Dominion to help establish refugee colonies elsewhere, thus build up a refugee colonies in other countries without any commensurate return to Canada directly.

(4) With a larger population Canadian manufacturers would gain some of the advantages of mass production and thus compete more fairly with United States manufacturers.

(5) Canada needs forest conservation and reforestation. Many Czech foresters' skill in this regard is world famous.

(6) A larger population in Canada will provide a better home market for our agricultural products of which we already create a surplus.

(7) If under populated countries like Canada, permitted the transfer of a certain proportion of the Eastern population to our shores it would bring the raw materials into closer proximity to the consumer and so eliminate the uncertainty of distant markets.

(8) The Czechs are among the most skilled farmers of Europe, and those Jews who are eager to become farmers in Canada would undoubtedly be an asset to the country. The extraordinary achievements of the Jews in Palestine have been little short of miraculous.

Cultural advantages derived by Canada from the admission of refugees are as follows:—

(1) The people, seeking sanctuary are for the most part highly literate. An unusual proportion have won Nobel prizes

Frank Bullivant Funeral Largely Attended Mon.

1st S. A. R. in Charge of Last Sad Rites

The funeral of the late Frank Bullivant who was killed in a car accident near Clevedale, B.C. last Wednesday was largely attended in St. John's Church, Medicine Hat on Monday afternoon. Rev. J. P. Butcher assisted by Rev. Hollingsworth and Rev. Layton officiated and the 1st S. A. R. were in charge.

Hundreds were unable to gain admittance to the church, and business was practically suspended during the time of the funeral. Frank was the only son of Mr. Bullivant Ex Mayor of Medicine Hat and his untimely death was greatly mourned by a host of friends and relatives.

Much sympathy is felt for Mr. Bullivant and his daughters Mrs. Whitwell and Miss Dorothy in their sad bereavement.

Mr. and Mrs. A. R. Ballantyne turned home Sunday afternoon a few days in Edmonton where Mr. Ballantyne attended the Trustees Convention as he delegate from Redcliff. They spent Saturday with their son George in Calgary.

to their contributions to science and machinery. We are being asked to receive some of the most highly trained and gifted experts of Europe.

(2) The refugees will have difficulty in learning our language or in adapting themselves to Canadian life. Many of the German Jews have already studied English in North America, and many have anti-semitism been economic rather than religious or racial. To some extent the Jew was supposed to be more addicted to sharp business practices and to harbour a different attitude in respect to financial honesty than his Gentile neighbors. The allegation of Jewish treachery of business ethics is not backed by compelling statistical data, other than the thoroughly discredited statements of Nazi propaganda, there is no authentic story indicating that the German Jew was not as honorable a business man as the so called Aryan. The record of achievement of German Jews in business as well as other fields is one of which they may be justly proud.

(3) They will be a genuine link for our democratic institutions. Many of them are suffering because of their loyalty to those democratic ideals. Above all, what do we need most on this continent—the Anglo-Saxon blood or the Anglo-Saxon spirit? Is it not primarily the Anglo-Saxon spirit—the love of freedom, the capacity for self discipline, respect for fair play, realism and freedom from superstition, intellectual eagerness, respect for culture and scientific attainment and especially in Canada the political savoir faire that wishes to be fair to all types of minority.

(4) They have a variety of skills which we in Canada lack and Europe's loss will be our gain. The Federal Government will consider the arguments in this spirit at the present session of Parliament.

Frank Bullivant

former editor of Texaco News, comes at Radio Station CPN. He was appointed publicity officer for the province of Alberta, in announcing this statement, Hon. S. J. Manning, Acting Premier, also announced the appointment of Mackay and Ed Savary Advertising Service or advertising agents for the Government.

ANGEROUS AGE— NINETEEN YEARS

Nineteen-year-olds, says the Federal Bureau of Investigation at Washington, D. C., from the largest single age group of arrests each year.

A survey made for the department of public welfare by the town progress administration showed that the average age admissions to the state penitentiary was 19. It revealed also that 88% of the admissions were under 25 years of age and of this group half were under 21.

Why should youths barely old enough to start on their first jobs, turn to crime?

Perhaps that question answers itself. Most of them can't get that first job. Bishop G. Bromley Knox finds that the young person reacts in one or two ways to lack of opportunity to work. Either "he wants to fight," simply rebels against the present set-up, or "he takes an attitude of complete resignation." The latter turns to crime, sabotage, violent actions of all sorts, alcohol and dope. The resigner turns to futile brooding. And he set result is a serious and usually permanent vitiation of youth's vital morale.

New the enlightened business man can tell you quite a little— in more academic language, thank goodness— about crime and its causes and cures, and he usually concludes with that old chestnut about an ounce of prevention. He likes it, says that he finds it the best answer to date to the problem of crime. And so he makes a place in his shipping room for a poor lad the social worker told him about— a kid, he'd like to climb up on the roof and shout to all the young folks in the world "For heaven's sake, be decent." But he knows what a ridiculous, what a pathetic lie, he'd cut. And so instead, he starts at home— to give the young people there a respectable chance to be decent. —Rochester Magazine.

St. Amrose Parish Hold Annual Meeting

Archdeacon Irwin Gives Fine Address on Home Missions

The Annual Meeting of the Parishioners of St. Amrose was held in the Parish Hall on Monday evening Jan. 16 with Archdeacon Irwin, Rev. H. S. Hamlett, Warden and about thirty parishioners present.

Reports of the various organizations of the church were received and adopted. Rev. H. S. Hamlett gave a short resume of the work of the parish during the year 1938, and Archdeacon Irwin addressed the meeting on the subject of missions.

The following officers for the new year were appointed: Vicars Warden— Mr. G. H. Worts; Peoples Warden— Mr. Stan Baldry; Vestrymen— W. A. Brown, A. D. Rose, A. E. Sanderson, W. Balmer, H. Leaning, I. R. W. Conn, H. E. Leppard, G. Martin and N. Rose.

Delegates to Synod: A. E. Sanderson and W. Balmer. Substitute Delegates: A. D. Rose and Harry Johnson.

Red Cross Representative— Mrs. A. E. Sanderson. Jubilee Committee: The president and one elected member from each adult committee.

After the election of officers, votes of thanks were tendered to all organizations, the organist and to Archdeacon Irwin for his attendance at the meeting.

As this year marks the silver jubilee of the dedication of St. Amrose Church, the matter of celebrating the event something during the year was discussed and the above jubilee committee was agreed upon.

The Archdeacon closed the meeting with prayer.

Young Redcliff Couple
Married on Monday

Pearson— Marley

A quiet wedding took place in Medicine Hat on Monday Jan. 16 (1939) at the Lutheran Church when Miss Dorothy Marley third daughter of Mr. and Mrs. John Marley of Redcliff became the bride of Mr. Sidney Pearson second son of Mrs. Harold Turner also of Redcliff. Pastor G. Kewer officiated.

The young couple who are receiving the good wishes of their many friends will reside in Redcliff and have taken up residence in the Fairbairn house on Fifth Street.

Mr. Herb Lang, who has been acting relieving agent for the C.P.R. for some months has taken up residence in Redcliff again.

The family will not now remove to Medicine Hat as they planned recently.

Exciting Hockey Game Here Last Sunday Afternoon

Time Killers vs. Smoke Eaters
Score 4-3 for Forster

The hockey game played here Sunday afternoon promised to be a grudge game, but owing to the fact that several of the Smoke Eaters were working at the factory the game was turned into an exhibition with several outsiders playing.

At the end of the first period the Time Killers were in the lead 2-1, and in the early part of the second period the score was tied up by the Smoke Eaters. The Time Killers scored two more goals before the end of the game and the Smoke Eaters scored only one, making it a 4-3 win for the Time Killers.

Both teams worked hard throughout the whole game. Eric Congram, the Smoke Eaters' head boiled defence man gave us plenty of action several times when he put on his one-man power play; when he gets up steam and starts down the ice, someone either goes down or goes out.

Redcliff's Eddie Shore (Elmer Congram) also was in his best form, what with riding up Bill McCreary's back, wailing on his big brother Eric and using his stick for things it never was intended for.

One Eyes O'Leary was a little off color owing possibly to the cut over his right eye received in the last game. Ken Wilson, goalie for the Time Killers, played another fine game in his usual good form. If he isn't careful he will end up by being a darn good goalie.

Feeling was running pretty high for a while, and it looked very much like war was declared, but everyone cooled off in a short time and no hard feelings were carried off the ice.

Local Legion Meeting

The regular monthly meeting of the local Legion will be held in the Club Room on Saturday evening Jan. 21st, beginning at 7.30. There will be a social gathering after the meeting. All members are requested to be present.

A debate is being held in the Church of the Nazarenes here tonight (Thursday). The subject of debate is set forth in the following resolution: "Resolved that we will bring greater spiritual results than those of Foreign Missions from equal monies and effort spent."

Six young people will take part some of whom will be from Medicine Hat. The judges will be Mr. Henry, Mrs. A. R. Ballantyne and Mrs. E. L. Stuart.

ESCAPE FROM THE MISERY OF COLDS

Use specialized medication for nose and upper throat where most colds start.

Stop! Prevent Colds Developing—Don't wait until a miserable cold develops. Use Vicks Vapo-Rol to keep the nose and throat free from mucus and irritation—put a few drops of Vicks Vapo-Rol in the nostrils immediately. Use it time and time again to prevent the development of many colds.

Use it more homes than any other medication of its kind

Projects With Possibilities

If Western Canada is to derive the maximum of benefits from the plans and operations of Ducks Unlimited, whose projects reached the stage of initial field work during the summer just past, close co-operation between and co-ordination with the activities of all departments of the federal and western provincial governments is highly essential.

At the outset of its active career in Manitoba, Saskatchewan and Alberta, Ducks Unlimited established a close contact with the Prairie Farm Rehabilitation Administration and the two organizations, with a joint objectivity of conservation and development, have maintained and have not only friendly relations but have exchanged information and have collaborated closely in carrying out their respective projects.

This is as it should be, for this co-operation and co-ordination can, and doubtless will in the future, be extended to harmonize with and further promote the activities of the provincial governmental departments, including those devoted to construction and maintenance of highways and those devoted to the administration of game laws and conservation of wild life as well as those concerned with agriculture, the development of the natural resources and public utility, to name some provincial governmental activities which could very well be in line with water conservation to the ultimate advantage of all concerned.

A Landable Ambition

For the benefit of those who may not be very familiar with the scope of operations and ambitions of Ducks Unlimited it might be appropriate at this stage to say that the primary objective of this organization is to conserve existing breeding and resting grounds for ducks in the northern reaches of the three prairie provinces, to extend them and to develop new ones wherever conservation of water and topographical features lend themselves to such an undertaking.

Where such areas are not already game preserves and bird sanctuaries it is proposed, of course, to convert them into safe havens for game birds and other wild life and the program includes providing artificial hunting grounds, where sportsmen who are willing to conform to the tenets of wild life conservation within the boundaries of proper control measures may take their pleasure.

A report on the first season's work carried out in the field by Ducks Unlimited reveals that three major projects, one in each of the three prairie provinces, including the construction of duck ponds and other contemplated projects will impound runoff water next spring and, to quote the organization's report, "realize to natural, profitable use, 100,000 acres of water, marsh and upland areas capable of producing 100 ducks of a total of ten million ducks."

Other Aids Necessary

It requires little imagination to sense what such an undertaking may well mean to the people of the provinces which are co-operating with Ducks Unlimited. It will open up untold acres which should prove valuable paradises for visiting hunters sportsmen and nature lovers from all parts of the continent, provided the necessary steps are taken to let them know that such places of recreation and rest exist and means to make them accessible are furnished.

Such an objective necessarily entails the construction and maintenance of adequate highways coupled with an effective program of publicity in those areas from which tourists with leisure and means can be drawn to enjoy the available attractions and incidentally, leave some of their good money in these provinces. The latter is a natural and inevitable corollary of the former.

With all governmental departments combining to provide all the necessary facilities to make the most of the site of these projects and of others which undoubtedly will follow in the future, it is not too much to expect that the results may well have a profound and beneficial effect on the economic life of the country.

International Goodwill

The possibilities for the future are well summed up in the closing paragraph of a report on the activities of the organization in the following words:

"Ducks Unlimited is a co-operative enterprise in sport and conservation—of international scope. Its immediate purpose is to restore and increase ducks—as an integral part of a sound development of all resources. Its ultimate results will include the promotion of understanding and goodwill throughout the whole continent."

Commemorative Coincidence

New Silver Dollar Will Be Struck By Royal Canadian Mint

A new silver dollar, commemorative of the visit to Canada next summer of King George and Queen Elizabeth, will be struck shortly by the royal Canadian mint, Prime Minister Mackenzie King announced.

The coin will bear the likeness of King George on one side and a design symbolizing the royal visit on the opposite side.

There will also be an issue of stamps in three series to commemorate the event. The one-cent stamp will be given with the features of the royal princesses. A brown two-cent stamp will show the national war memorial which His Majesty will unveil next May, while the likeness of the king and queen will appear on the three-cent stamp which will be large in size and red as at present.

The land snail squirrel ground squirrels each fall. They grow to a length of 1 1/2 inches by midwinter and fall off at the spring.

In England, a Sunday Mail states that "but few" have been brought on the shelves, but no "potted plants."

Science says four out of five people are untouchable by nerves. They are the ones you hear honking.

Germany has prohibited the use of wheat and rye as fodder.

Farther North

Highway Opening Up West Moves Areas In Manitoba

One hundred miles of highway now connect The Pas with Marquette and points south, to provide a link between the "hinterland" and the "outlet" of Manitoba. There remains only the official opening of No. 10 highway to introduce this fact to the general public of Canada.

Some day, perhaps the road will be carried to the shore of Hudson Bay—opened by highway to the north, northerly port in America, Churchill, with Cape Horn, to the South.

To serve the mining communities of Pin Point, Hertz Lake and Cranberry Portage, the anticipated site of immediate future development, the road must be carried to the Portage. From there its future traffic will be carried economically by large trucks to and from surrounding communities.

Only 40 miles of new road, at the most, are necessary to offer a fair guarantee that the trade and benefits from these mines, and the future will accrue to Manitobans. The builders of the new road—Northern Trail, The Pas.

Wild Fox Photographed

Miss Squire, Of Kansas, Spends Summer In The Far North

Miss Lorena Squire, one of the foremost wild-fox and game photographers in Canada and the United States, is back in Harper, Kas., after another summer of camera shooting in Canada's northern regions.

A color roll of the Canadian reindeer herd on Richards Island, Mackenzie Inlet shows of rare black and white snow scene and a close-up of a stock of wild geese are a few of the pictures taken on her latest expedition.

Miss Squire studied in University of Kansas, majoring in dramatics but turned to photographing after graduation in 1922. She says she does not make sufficient money at her photography to let it be a profession but spends far too much time at it to call it a hobby.

Miss Squire went into the north in June, she travelled by plane via Vancouver, to a trip from Churchill, Man., to Baffin Island via the R.C. mail plane. She said she loved life in the north and planned to return next summer.

A Hungarian shepherd, 61 years of age, is reported to have dropped in the middle of the St. Lawrence River as shown on the map in New York's Legislative Manual marks the return of the wanderer, unwittingly "condemned" to Canada several years ago by an erring mapmaker. Previous copies have shown the 400-acre spot, off Matamoras, in relation to conform with the province of Ontario.

No international incident has arisen over the error. In fact no one noticed it until, A. J. Bellines of Canada trained his eyes on a map sent him by the secretary of State's office last July.

The guy who used to blow his horn is now blowing his automobile's.

DEATH FROM THE SKY IN SPAIN

The Christian world never has adopted one uniform Bible. There are ten different versions in use today.

The Casquiaga river, in Venezuela, flows in opposite directions in different seasons.

It is estimated that rodents, insects and other wild life leave only 25 per cent. of the range grass for livestock.

Agnes of stars can be told by their color which changes as they grow older.

An adult needs about 800 pounds of fresh vegetables a year.

Small fish are burned as candles in Albanian houses.

Look out below! Death's coming and it's coming fast! A remarkable picture over Valencia, Spain, showing Spanish insurgent bombing planes dropping their bombs of death on the city of Valencia, miles below. Note the smoke of fire caused by other bombs.

Register For Service

Reduced Men Volunteer Services In Event Of War

Voluntary effort on the part of Canadian organizations is resulting in a national registration of professional men and technical men whose services might be placed at the disposal of the emergency of war.

With the concurrence of the national defence department this "register" is at present being undertaken by the Engineering Council of Canada, the Canadian Institute of Chemists, the Canadian Institute of Mining and Metallurgy and others.

The policy is in line with that being carried out in the United Kingdom in finding out what war was like. As a rising diplomat he drove, against obstacles now fully realized, to perpetrate the spirit of Locarno and extend the pacifying influence of the League of Nations. He showed a natural devotion to the strength and dignity of his own country, but it was joined with a larger loyalty to European civilization. Refreshing memory of his training and record one recalls that he once wrote art criticisms for a Yorkshire paper, that his knowledge of French languages, but his adventures in art and erudition did not blunt the edge of his courage, as he showed conclusively the crucial test he had to meet last February—New York Times.

New Patent Syrup Jug

Long realized the need for a syrup jug that would make pouring syrup easier, the makers of New Syrup now have one. This jug is retailed in Toronto stores at \$1.50 for a 40-ounce size and \$3.00 for a 40-ounce size. The price is the same for all sizes.

Already the defence department possesses information relating to the quantity and capacity of various Canadian industries. More than 800 plants have been surveyed and all facts regarding their production and processes have been filed.

Chemical experts are studying how best these plants may be converted from peacetime to wartime work in case of necessity.

No Trouble Over Return

Mark Mahan Put Island Back Into United States

Bartholomew Island is back in the United States. A dash of yellow dropped in the middle of the St. Lawrence River as shown on the map in New York's Legislative Manual marks the return of the wanderer, unwittingly "condemned" to Canada several years ago by an erring mapmaker. Previous copies have shown the 400-acre spot, off Matamoras, in relation to conform with the province of Ontario.

No international incident has arisen over the error. In fact no one noticed it until, A. J. Bellines of Canada trained his eyes on a map sent him by the secretary of State's office last July.

The guy who used to blow his horn is now blowing his automobile's.

WHAT'S THIS? IT'S SHELLS! GOOD!

OH, JUST SOMETHING! I HAVE LEFT-OVERS!

I HAVE LEFT-OVERS!

HOW KEEP YOUR SHIRT ON YOUR BACK! TASTE IT!

The Flag Of France

Why The French Tricolor Still Flies In Quebec

Why does the French Tricolor fly from so many masts in the Province of Quebec? This is a question that is frequently put to guides and information bureau clerks by United States visitors to French-Canada.

Use of the French flag seems to have led many tourists to believe that French-Canadian flags imagine they have some kind of political bond with France and occasionally they go to the idea of establishing a miniature French republic on the banks of the St. Lawrence.

Nothing is further from the truth, which is briefly as follows: In 1842, a Swiss Protestant named Aude proposed to the general assembly of the Saint Jean Baptiste Society of Quebec that the Tricolor should be recognized as the flag of French Canada, but the motion was rejected. The French-Canadians wanted none.

Two years later, however, in 1844, the British Empire was celebrating its third centennial anniversary, the viceroys of Alberta, Saskatchewan and the Yukon—episodes of the Crimean War—won by the allied armies of England and France. Through the English-speaking world the Union Jack and the Tricolor were flown together, and the capital letters V and N—the initials of Queen Victoria and the French Emperor Napoleon III—were displayed along with the names of the two victorious generals, Simpson and Pelissier.

On July, 1852, the British Admiralty allowed a French ship, "La Capricieuse," to penetrate the waters of the Saint Lawrence as far as the port of Quebec. It was the man-o-war of the population; Quebec, as well as France, brought out the French flag left over from the previous year. This event, of course, profoundly touched the French-Canadian people. It was the first time in 95 years that a naval unit from France had appeared in Canada, and a wave of sentiment was set up.

That is how it comes about that the Tricolor of the French Republic is flown in the Province of Quebec. It was originally a matter not of politics but of courtesy. It is still a matter, not of politics, but of habit and half-conscious sentiment. From the designer.

Boys Lose Interest

British Amateur Deputies Lack Curiosity In Young Students

Disappearance from British medical school entrance lists of boys who hunted bugs, collected frog eggs in their bedrooms and kept white mice is causing great heads to be shaken in teaching circles.

An unidentified anatomist, writing in the London Lancet, complains "very little curiosity" is shown by the medical student as he enters on his second year. He is quite prepared to be taught the facts of anatomy, but he has singularly little ambition to satisfy his own curiosity by finding out things for himself. "The anatomist declared: 'The man I miss most of all is the old-fashioned 'bug hunter,' the boy who kept the medical student and secretary of the association, who left for America in 1914, and who has since been heard of no more. Mr. Bartlett will arrange for the reception of young Britons in America for the use of young Americans to Britain. He hopes to talk to both Lord Tweedsmuir and President Roosevelt about his scheme."

"Just what has led to the partial extinction of this type I do not know. I deplore it for the reason that the 'bug hunter' often took up the study of medicine in that it seemed that in that way he might pursue his hobby, at the same time, earn his living."

May And December

Australian vital statistics for 1937 show that a girl of 17 married a man of 67. But in Canada in 1936, states the Toronto Star, a girl of 17 married a man in the 75-79 age group, and a groom of 36 married a bride in the 65-69 age group. Twenty-two groups were 80 or over, the youngest woman to marry one of these being 43. Thirty-four brides were 70 or more, and one of them married a man of 46.

Callers Of A Ride

"Did you happen to know that the ride of a ride represents the distance between the raised parts of the horse's back? Then, a 32 call ride is 22-100th of an inch between the 2nd parts of its back."

Artillery shells "go to sleep" during long, swift flight, says a scientist. But they have an unpleasant habit of waking up at the end of the flight.

The students were carrying bags with mysterious designs in the belief that they would prevent evil sounds from entering the ear.

Credit For China

Expected British Will Make Loan For Building Of Highway

China, it is expected, will be granted a \$500,000 (\$238,125) sterling credit to buy trucks and other equipment for use through the highway between Umanfa and the Burma border.

The credit will be advanced as soon as a government bill creating a fund of \$10,000,000 for credits of a similar character has passed through parliament. A larger sum may be advanced later, possibly for more military equipment.

The \$10,000,000 fund will be available for export credits extended by the government for political reasons as distinct from the \$75,000,000 for straight business purposes. The general purpose of the China credits is to look after British financial interests in that country.

Great Britain has sent protest after protest to Tokyo but Japan has failed to put into practice her undertakings not to disturb or jeopardize British interests in China.

Having failed to protest in Japan, Great Britain now intends to give more assistance to China and attempt to destroy Japanese policy of creating an economic bloc in Asia. One of the aims of the British government is to bring about a "back door" route into China. Gangs of peasants estimated to number 10,000 are working day and night to cut the railway which is imperative to China's continued resistance because the country now is largely cut off from Japanese occupation of the sea coast.

Canadian Art

Honored By Being Shown In London's Famed Tate Gallery

Canadian art has been honored by being shown in London's famous Tate Gallery. The exhibition has been a pronounced success. It is the first time in 100 years that a Canadian artist has been shown in the Tate Gallery. The exhibition is the first time in 100 years that a Canadian artist has been shown in the Tate Gallery. The exhibition is the first time in 100 years that a Canadian artist has been shown in the Tate Gallery.

While in London Mr. McCurry said arrangements for several important exhibitions of British art to come to Canada in 1938 and 1940. These collections will be shown in all major cities of Canada, the museum of the national gallery.

Goodwill Ships

British School Children To Visit Canada And U.S. Plans for school children's "goodwill ships" to visit Canada and the United States in 1940 are being prepared by the British Ministry of Education and Secretary of the association, who left for America in 1914, and who has since been heard of no more. Mr. Bartlett will arrange for the reception of young Britons in America for the use of young Americans to Britain. He hopes to talk to both Lord Tweedsmuir and President Roosevelt about his scheme.

The School Journey Association, founded 25 years ago, is a voluntary association of teachers who arrange educational visits for school children to various parts of Britain and abroad. The children are drawn almost entirely from elementary and secondary schools. Almost 70,000 children now take part annually in school journeys and last summer more than 15,000 went on trips abroad.

Wears Out Quickly

The Union Jack that flies above the Victoria Tower of the Palace of Westminster in London, where the House of Lords is in session is probably replaced more often than any other flag. Frequently the wind is so violent that it reduces to shreds as many as three emblems in a single day.

The migration of birds is thought to have started in the latter part of the last century, probably when the first shot came down from the north.

A man has married a policeman who recently interrogated him. It seems that she took his name and address.

The whale shark, largest of all sharks, has the smallest teeth, but has about 8,000 of them in each jaw.

Glaciers are never of ice moving steadily at the rate of one foot to 60 feet a day.

BRITISH TROOPS STILL BURY ROUNDING UP THE ARAB REBELS

Competitive calm exists throughout Palestine as the British troops make a thorough search for Arab rebels who have been terrorizing and plundering Jewish towns and villages. This picture shows police searching Arab passengers as they leave a bus on the outskirts of Jerusalem.

Not Measured In Years

If People Are Young In Spirit Age Does Not Count

One essential quality of leadership is that it be youthful in its spirit and its enthusiasm. But youthfulness is not something to be measured in years.

Most of us think of the Fathers of Confederation as greybeards. Time has surrounded them with an aura of venerable tradition, of hoary orthodoxy. Yet there could have been no Confederation had these leaders been old.

The average age of the men who gave birth to this dominion was 35 years. There were a dozen men in the forties. The youngest of the Fathers was 28. All of them were young in spirit, in courage and in vision.

The average age of the present dominion cabinet at Ottawa is 57. Three are in their forties. Seven are in their fifties. Five in their sixties. The leader of the Senate is 77.

Through the hourglass of the present administration will shortly run out, there is still time in which to demonstrate that today's "Fathers of Reconciliation" are as young in their spirit, their courage and their vision as the "youngsters" who started this country on its way in 1867. —Musical Post.

Music Of Exiled Composer

Allowed To Be Held Because Money Stayed In Vienna

Kurt Weill, the Viennese composer who now is in America, wrote to his music publisher in Vienna and notified him that—although the music has been banned in Germany—there was demand for it there, and a sale could be arranged, says Leonard Lyons, in the New York Post. The publisher notified Goebbels, the Propaganda Minister, who became interested because the purchase-money would be delivered in Vienna. Goebbels consented to the shipment of the music under certain conditions—and so the music arrived here. It has been sent to the shipyard of the music publisher in Berlin. He has been told that the music is a prisoner. His Stern Tropen removed and shipped it, but it is still in the shipyard. He has been told that the music is a prisoner. His Stern Tropen removed and shipped it, but it is still in the shipyard.

Great Britain imports more commodities from Russia than does any other country in the world.

Smokers of Portugal are changing from cigarettes to pipes.

Journalistic Award

Winston Churchill Awarded Gold Medal For His Latest Book

Winston Churchill reported to have earned a small fortune for his literary works and articles on current political affairs, has been awarded a gold medal for his latest book, "Marlborough: His Life and Times."

Britain's noted statesman shared his honor with three other authors whose works were adjudged "the most outstanding" during the past year by a jury of distinguished writers. The medal, awarded by the London Sunday Times, were presented after thousands of books had been reviewed at the National Book Fair.

Mr. Churchill's study of the life of his grandfather, the seventh Duke of Marlborough, was placed first among the year's output of biographies. Other awards in their respective categories were: "The Great War," by G. M. Young; "Pillars of the Earth," by Hilary Mantel; "Travel—South Latitude," by F. D. O'Malley.

Proper Ventilation

Some Hints About Circulation Of Air In Bedrooms

From the extreme policy of having the bedroom windows wide open on a very cold night, hygienists have turned to the "closed door" policy.

From the extreme policy of having the bedroom windows wide open on a very cold night, hygienists have turned to the "closed door" policy. They advise that our windows should be opened enough to make a circulation of air in the room but not to make the room too cold. "Sleep comfortably" is their present edict. This means that we will not draw a new mitten, to keep that appendage from freezing or being bested in the morning.

poorly ventilated room results in headaches, but a room so cold that it is chilly all night interferes with the rest which a night of sleep should give. Delicate people and elderly people need the room warm enough that they will not have to struggle all night with the weather. If robust young people can enjoy the winter it is all right for them to throw their windows wide open.

A Massachusetts judge, 80 years old, contends that a man ought to stop work when he gets to his age. Either that, or write a book called "Life Begins at Ninety-Five."

The bald head and neck of the vulture are natural provisions of nature, to prevent fouling of its plumage on unclean carcases, the bird's favorite food.

UNITED STATES PLANES AND CRUIBER PAY COURTESY CALL

Low Standards

Juvenile Delinquents Causing Bitter Prison Authorities Much Concern

Education of boys sent for causing trouble to the Federal Reformatory institution for juvenile offenders, is causing deep concern to British prison authorities.

In his report to the commissioners of prisons, the governor of the Borstal institution describes the depths of ignorance in boys coming in as "abysmal" and says some after long schooling are unable to tell the time, name more than three months in the year or know the year of grace in which they live. One, he said, thought Queen Victoria was still on the throne, while another believed Lord Kitchener was prime minister.

Experienced house officers at the institution realized their duties night include instruction of lads of 17 and 18 in the use of knife, fork and spoon, the place of soap and comb in personal hygiene and the convention of removing coats of the outer clothing before going to bed.

"If a housemaster does not regularly supervise his dormitories," the report adds, "a sudden raid will always produce one or two lads in bed fully clothed to their boots, several in shirts and trousers and a majority in vest and stockings."

Has Small Population

Possible New Home For Jewish People Larger Than Britain

British Guinea, one of the principal territories mentioned as a possible new home for Jews driven from Central Europe, is larger than England, Scotland and Wales combined. It has a population of only 100,000, and the density of population is low. It is a former German colony in Africa, as suggested, the Jews would continue in fear of pogroms.

Giant clams often attain a weight of several hundred pounds and have a diameter of several feet.

The big prehistoric elephants known as mammoths were covered with long, reddish-brown hair.

What's In A Name?

R.C. Apple's Find Power On Markets Of Western Canada

A reader has been telling us about his purchase of a bundle basket of Ontario apples. The basket was, he says, stamped No. 1. It was with the name and address of the picker in Ontario county. The apple in the basket was the size of a golf ball, were the big size of good color. But as this ultimate consumer worked his way downwards he found a great change.

The great majority of the apples in the basket he says were neither Number One nor No. 2, and they were far, far below No. 3 quality. He showed them to the dealer from whom the apples had been bought, and who had sold them in complete good faith. The dealer agreed they were not No. 3, whatever they were, and that many of them couldn't be called No. 1, by any stretch of the imagination. The outcome of the incident was the making of a British student customer for British Columbia apples.

Probably it is the literal truth to say there are no finer apples in the world than Ontario apples, but it is not entirely true to say that specimens carefully picked, well-packed, of uniform quality. The purchaser of a basket of R.C. apples knows from experience that he can depend upon the marked grade. He knows, however, that the apples are because the bottom row is of the same size and quality as the top row. The social is a social mystery of fruit-picking, but it is something many Ontario packers have still to learn.—Ottawa Journal.

Well Worth Attending

Pic Social Is One Entertainment That Always Draws A Crowd

Here and there in the farm communities you can see, almost any day, a crowd of people gathered for a picnic. The picnic is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people.

A picnic is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people.

A picnic is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people. It is a social gathering of the people.

Most Popular Entertainment

Hot Quarter Of World's Population Has Never Seen Movie

Although the movie has become the world's most popular form of entertainment since the first picture picture show was presented in New York City in 1895, the number of people who have never seen a movie is estimated at 475,000,000, or nearly one quarter of the entire population of the globe.

Where Sun Appears To Turn

The sun makes its annual apparent north and south journey between the tropics of Cancer and the tropic of Capricorn. The word "tropics" is derived from the Greek word "tropos" meaning "to turn," and as of these imaginary points the sun appears to turn and start back toward the equator.

Chimpanzees and some monkeys learn when they are pleased, according to naturalists.

The U.S.A. cruiser "Borah" recently paid a courtesy call to Capetown, South Africa, the first time in fifteen years that a United States vessel had been to the Cape. This picture shows two airplanes of the cruiser flying in formation over Cape Town.

WORLD HAPPENINGS
BRIEFLY TOLD

Organized labor in Great Britain is prepared to fight strenuously any attempt to impose conscription in peace time.

The Italian cabinet ordered troops to exchange all their land and buildings exceeding a fixed value for bonds bearing four per cent. interest.

Population of the area of London coming under the London county council has declined from 4,397,000 in 1921, to 4,094,000 in June, 1927.

Four torpedoes, loaded, are reported to have been ordered in Great Britain for the Swedish navy, at a cost of about 2,000,000 kroner (about \$200,000).

Eight persons were burned to death in the customs house at Alexandria, Egypt, when 20 cases of motion picture film caught fire during customs examination.

George Willis, a wharf manager, said at Victoria the famous Linsenbaur, N.S. schooner business agent, visited Victoria, Vancouver and Poughkeepsie, New York, on his return from a tour of inspection.

Victor Cherkoff, 34, one of the three Soviet Russian aviators who crossed the North Pole from Moscow to Vancouver, Wash., in 1927, was killed in a crash while testing a new plane.

Next February more than 40 sturdy fishing boats will chug. Equipped naval base near Victoria to begin a month's training as units in the defense system of the Pacific coast.

Holder of the world's land speed record of 307 miles an hour, Capt. George Eyston was fined \$250 (£4.00) for speeding on Victoria's Esplanade. He was clocked at 27 1/2 miles an hour.

In accordance with a concrete plan laid down by the Eire government, large shipments of wheat are pouring into the country from the United States until enough grain is sent Eire for a year in case of war, is in storage.

Winter Sports in London

Canadian Premier is Staging Huge International Indoor Display

In London, the damp metropolis where a snowstorm comes once in a blue moon and is about as substantial as a dud on a blue suit, a Canadian is being hailed the creator of winter.

It is never Armand Vincent of Montreal, whose \$150,000 winter caveau at Earl's Court is the biggest sport promotional venture ever staged under one roof in Britain.

It is a large-scale international indoor winter sports festival, the first of its kind, which is being staged in London. The program includes a snowstorm, skiing, ski-jumping and snowshoeing, and a number of other French revues of 100 chorus girls.

Twelve thousand spectators including members of the royal family are expected to witness the big show, staged on a full sized snow-covered ski run with a realistic scenic mountain in the background.

Bert Paquin, floor manager, Norman Oakes, ski jumper, and Chief Poking Fire, Louis Poking Fire, Paul Varnum and Dan Cunningham, snowshoes, all from Quebec, are other Canadians taking part.

A Smart Salegirl

Managed To Secure Subscription To Magazine By Clever Hint

Many a policeman in Detroit is blushing over this one: A pretty brunette, who said she was from Kentucky, failed to sell subscriptions to a religious weekly until she bet the policemen one subscription she could tell their weight to a pound; how many birthdays they had and to within three days the price of Mr. B. Each cop readily paid the \$1 subscription fee that she answered: "Four weight to the pound, 100 pounds. You each have had an birthday, the rest were anniversaries. And you were born within three days of Wednesday."

Not Good Organizers

When Germany had colonies she made no profit and little use of them and the Nazis' ideas of domination were in force there long before it became a Hitler obsession. The Germans, states the *Branden Sun*, are not real colonizers under German rule. All the successful settlers from Germany have done well under other flags.

The earth's temperature increases on an average of one degree Fahrenheit for each 60 feet of depth.

In Berlin, the common cure for headaches is a crushed onion, massaged on the forehead.

Before it selects a place to spawn the king salmon of the Yukon, it often swims 7,000 miles upstream.

VETERAN RETIRES

Retires Gold One Which Will Be Sent To Museum

President Roosevelt, in accepting a new plane for the White House, dedicated it to "the advancement of peace in every city, town and hamlet in the country."

The presentation ceremony was conducted through the channels in the West Room of the White House. Mrs. Roosevelt acted as mistress of ceremonies.

The new plane, replacing an old one which has been used since 1903, was given by Stetson & Sons, Theodore E. Stetson, making the presentation speech, said it was an expression of appreciation "by a family who arrived on these shores and was permitted to pursue its work and make a living in an atmosphere of friendliness."

Repeating the President said the old plane would be sent to the National Museum, where it would be "one of the treasures of the National government."

Calling attention to the legs of the new plane, carved in the shape of eagles Mr. Hoover said he thought "Art has improved since 1903."

"Art has at last caught up with ornithology," he said. "These eagles are eagles and the others (on the old plane) weren't."

The second veteran shipper of the British Columbia Coast Steamship to retire during 1928 is Captain Clifford C. Salaty, lately of the Princess Elizabeth in the Vancouver-Victoria night run. Captain Salaty has been with the B.C.S.C. for 26 years.

Eastern Arctic Mail

Eskimo Population Now Sending Messages To Widely Separated Families

Canada's Eskimo population is making increasing use of the mail; according to officials of the Eastern Arctic Patrol, letters are being sent between widely separated Eskimo families now form a considerable part of the mail carried by the I.M.S. Naupole on the annual cruise to posts along Hudson Strait and Bay and on the Island of the Arctic Archipelago.

Most of the correspondence between the Eskimos is carried on in the syllabary which makes use of some 60 phonetic characters, and is more adaptable to the formation of Eskimo words than the English alphabet, but which often makes their words long and cumbersome. The natives of the Eastern Arctic are proud of their ability to read and write the syllabary, and delight in making use of the postal facilities to communicate with their relatives and friends.

To the white population of the Eastern Arctic the northern mail service also brings its blessing, as the Eskimo pilot who flies to widely-scattered posts. Supplies, food and clothing are at all times welcomed by the fur traders, missionaries and Royal Canadian Mounted Police at the different stations, but it is the letters, messages and gifts from home, newspapers and reading matter, which are looked forward to and awaited with eager anticipation.

While to a considerable extent the radio is the principal contact of the northern posts with the outside world it is the mail service which provides the intimate link with the outside world.

Therefore little known to the public, the Eastern Arctic mail service is rapidly becoming an annual event of outstanding interest. To philatelic circles it is one of the world's of special interest, and recent years have witnessed a greatly increased volume of mail passing through the outlying posts of the North and the heavily populated cities and towns of many countries for postal stamp-collecting purposes.

During the past year the postal facilities provided throughout the Eastern Arctic were widely used. In many cases the supply of postage stamps was considerably increased as in many instances the postmaster reported that the previous year's supply was completely exhausted before the arrival of this year's expedition.

TWO SMART NIGHTIES FROM THIS

By Ann Adams

Indian Farmers on Blood Reserve, Near Cardston Make Good

Indian farmers living on the Blood Reserve, Cardston, Alberta, harvested a record grain crop this year, according to the Department of Mines and Technical Surveys, Ottawa. With their big operations completed, the total grain yield on the reserve is reported to be 30,411 bushels comprising 10,713 bushels of spring wheat, 6,833 bushels of fall wheat, 4,933 bushels of fall rye, and 39,847 bushels of oats.

An threshing procedure—the fields were cleared, some 700 acres were again noted to fall wheat for next year's crop. In addition, 8,000 acres of summer fallow has been cultivated by tractor and horse and are in readiness for spring seeding.

Farming and livestock-raising are the principal occupations of the Indians on the Blood Reserve, and their achievement in harvesting more than 30,000 bushels of grain reflects the progress being made in Indian rural rehabilitation in Canada. Originally these people subsisted in moderate comfort upon the harvest that nature provided, but with the settlement of the prairie and the accompanying depletion of game resources, the Indians were forced to turn to agriculture in order to support themselves. After twenty years of farming the Indians on the Blood Reserve have made good and are now the most prosperous and self-sufficient of Canada's Indian population.

The very thorough report made by Dr. G. M. Little D.P.H., Medical Officer of Health, Edmonton, is the basis of the Journal's leading editorial in this issue.

"When the disease was first recognized in Canada ten years ago it was felt that in view of the widespread infection of India herds with contagious anthrax many cases would be reported. But the contrary, less than two hundred cases were reported last year. Several of the patients did not report any cause. In the United States the disease is not reported any more."
